

IMPROVING QUALITY OF TEACHING IN INDUSTRIAL SAFETY IN FIELD OF CYBER-PHYSICAL SYSTEMS

Professor Nadezda Kunicina has published a new report “Improving quality of teaching in Industrial safety in field of Cyber-physical systems”

She used a NORDTEK Travel Grant for Teachers.

The aim of this academic mobility was sharing of expertise and knowledge as well as achievements in information and communication technologies, and security of cyber-physical systems in order to improve

quality of teaching, abilities of students and improve content of lectures in Industrial safety in field of Cyber-physical systems.
