

VISIT TO ARCTIC UNIVERSITY OF NORWAY IN NARVIK

During the week from February 2nd to 6th, 2025, assoc. prof. dr. Andrius Jaskūnas from Department of Physical and Inorganic Chemistry, Kaunas University of Technology, Lithuania, visited Arctic University of Norway, Campus Narvik. UiT Director of Engineering Studies **Espen Johannessen** kindly provided the invitation.

Visit to UiT was dedicated to visiting teaching staff and conducting classes. Andrius Jaskūnas taught students about product and process engineering basics in the module Chemical Technology and Statistical Process Control which is coordinated by **Espen Johannessen** and **Per Persson**. Students were happy about the possibility of having three teachers at the same time and listening to the classes as a discussion which was conducted in the form of podcast. Andrius, Espen and Per all shared their views and opinions about the future and recent developments in chemical engineering – both in Norway and Lithuania.

At the end of the week, together with head of Department of Industrial Technology **Wei Deng Solvang**, colleagues **Geanette Cleotilde Polanco Pinerez**, **Per Persson** and **Espen Johannessen** we celebrated *soldagen* – traditional celebration marking the return of the sun in Narvik. While eating *solbolle* we additionally discussed the further promotion of research and teaching collaboration between our universities.

I'm grateful to NORDTEK for presenting this opportunity to meet my colleagues at UiT.

Assoc. prof. dr. Andrius Jaskūnas
Head of Chemical Engineering Programmes
Kaunas University of Technology
